Deadlines
 Funding Expertise. Personally Delivered.

December 11, 2017

This publication includes deadline dates for the month of March 2018 and late announcements for the months of February 2018 and January 2018. Proposals submitted by a referenced target date will be included in a particular review cycle, while those received after the target date will be held for the next review cycle. It is advisable to contact the program staff cited in each listing to obtain all available information.

Those deadlines marked by an asterisk () are tentative. In some cases, these are specific dates that may change depending on the timing of the deadline notices and in others, we have listed just the month during which a deadline is expected. Deadlines marked by a double plus sign (++) are target dates.**

Agency: National Science Foundation

Next Deadline: Feb 20, 2018

Supports innovative robotics research and applications emphasizing the realization of collaborative robots (co-robots) acting in direct support of and in a symbiotic relationship with human partners. The focus of the current program is on ubiquity, which in this context means seamless integration of co-robots to assist humans in every aspect of life. Also focuses on understanding long term social, behavioral and economic implications of co-robots across all areas of human activity. Collaboration between academic, industry, non-profit and other organizations is strongly encouraged. Topics may be related to NASA, USDA, NIH, DOD, DOE and NSF.
